

CORAL REEF MAPPING: MANAGERS

Learn how coral reef mapping can help inform your management practices!

Attend our FREE live online training event for Commonwealth country officials presented by Dr Karen Joyce. Learn how remote sensing and GIS technologies are used in coral reef mapping, and discover resources available to help you make data-driven management decisions.

1st June 2021: Either [4 - 7am GMT](#) or [12 - 3pm GMT](#) (3hr session)

- 01 Learn why coral reef mapping is important and how geospatial technologies are used to help
- 02 Explore case studies with other managers and technical experts, including an introduction to the Allen Coral Atlas
- 03 Discuss resource requirements and how to best achieve your goals
