

CORAL REEF MAPPING: TECHNICIANS

Learn how to use online tools for coral reef mapping!

Attend our FREE live online training event presented by Dr Karen Joyce. Learn more about remote sensing and GIS technologies, and the resources available to help you map and monitor your local to regional coral reef ecosystems.

3rd June 2021: Either 4 - 7am GMT or 12 - 3pm GMT (3hr session)

- 01 Learn why coral reef mapping is important and how geospatial technologies can be used to help
- 02 Get hands on experience with the Allen Coral Atlas, REMAP, and QGIS
- 03 Understand the benefits and limitations of tools and techniques currently available for coral reef mapping
